

EXCEPTIONAL POOLS

Elevating ePump™to the next level.

High-end pools require powerful pumps. With 24% more hydraulic performance than our 2.7 HP ePump model, the Jandy $^{\circ}$ ePump 3.8 HP is a low-maintenance, variable-speed pool pump supporting a wide range of applications.

Power All Your Features

With excellent hydraulic performance, the applications are endless. From filtration to negative edges and everything in between—waterfalls, water features and spa jets.

Fast, Simple Setup

Quick and intuitive, the optional SpeedSet™ Controller allows you to quickly set up and program the ePump, making installation and maintenance a breeze.

• Better Performance

Small pump baskets fill faster — restricting flow and eroding performance. The ePump helps reduce maintenance and improve performance with the largest-capacity, smooth-surface basket in the industry.

• Two Programmable Auxiliary Relays

Two programmable¹ auxiliary relays can be used to safety -interlock and power other pool equipment, like booster pumps and salt chlorinators, without added timeclocks.

Automation Ready

Take control of your pump with iQPUMP01 or a Jandy Aqualink® Automation system and control it all with the iAquaLink® app for simplified pool operation.

Additional Features

- RS485 Quick Connect Port for faster installation and maintenance
- > Four-Speed Dry Contact Relay Control
- Easy controller setup auto detects connection to an automation system or a traditional controller, eliminating the need to adjust settings manually
- > 2.5" x 3" Unions Included
- > Ergonomic carry handle for easy installation
- Tool-free lid allows for quick and easy cleaning of the pump basket
- Zero Clearance Totally Enclosed Fan-Cooled (TEFC) permanent magnet brushless DC motor that provides cooler operation and extended motor life

• Choose Your Own Controller

Designed to work with the following Jandy control systems for complete programmability and customization:

- SpeedSet Controller (included and preinstalled from factory on all 2AS models)
- > iQPUMP01 with iAquaLink App Control
- > Jandy AquaLink Automation Systems
- > JEP-R Controller

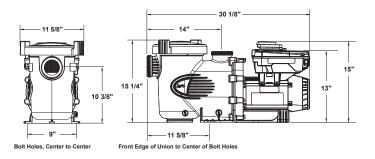

MODELS

| Model No. | Description | | | | |
|-------------|--|--|--|--|--|
| VSSHP3802AS | ePump 3.8 HP, SpeedSet Controller Preinstalled | | | | |
| VSSHP3802A | ePump 3.8 HP, Controller Sold Separately | | | | |
